

Technology Stack

Date	29-09-2026
Team ID	SWTID-2026-6268
Project Name	A CRM Application for The Chai Shop & Co.
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	Salesforce Lightning Experience	Provides the user interface for managing customer accounts, employer accounts, enterprise accounts, orders, reports and dashboards through an organized CRM application.
2	Backend / Server-Side	Salesforce Platform	Provides the platform services required to manage CRM records, business rules, validation rules, automation and application functionality.
3	Database / Data Storage	Salesforce Data Storage	Stores Customer Account, Employer Account, Enterprise Account, order and sales information in a centralized CRM environment.

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
4	Cloud / Hosting / Deployment	Salesforce Cloud Platform	Provides cloud-based access to the CRM application and allows the Chai Shop & Co. application to be accessed through Salesforce Lightning Experience.
5	Version Control & CI/CD	Not specified in the project documentation	The provided project documentation does not specify a separate version-control or CI/CD technology.
6	Third-Party APIs / Other Tools	Salesforce Email Templates, Email Alerts & Flow	Supports customer communication and business-process automation, including order confirmation and scheduled automation within the Salesforce CRM.
