

Scalability & Future Plan

Date	29-09-2026
Team ID	SWTID-2026-6268
Project Name	A CRM Application for The Chai Shop & Co.
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

S.No	Limitation	Impact	Priority to Address
1	Limited to the current Salesforce CRM configuration	May require additional configuration when the number of customers and orders increases	High
2	Reports and dashboard are based on the currently configured data	More complex business analysis may require additional reports and dashboard components	Medium
3	Current automation covers the implemented business processes	Additional business processes may require new Flows and automation	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports users managing customer, account and order records	Add more users and configure appropriate Salesforce access and permissions
2	Data Storage	Customer, Employer and Enterprise data are stored in Salesforce objects	Expand Salesforce data storage and improve data organization as records increase
3	Performance	Reports, dashboard and CRM operations are available through Salesforce Lightning Experience	Optimize reports, dashboards and automation as data volume increases
4	Security	Validation rules and Salesforce access controls are used	Enhance user permissions, roles and security settings for additional users

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Add more advanced reports and dashboard components	Future	Better sales analysis and business decision-making
Phase 3	Expand automation using additional Salesforce Flows and email alerts	Future	Reduce manual work and improve process efficiency
Phase 4	Enhance CRM with additional features for larger customer and order data	Future	Support business growth and increased system usage
